

I respectfully urge the FCC to reject NABs Petition 04-160, XM radio is doing a great service with many good choices of programming. Lets not loose a good thing. The NAB in my estimation would make it conform to some of the dribble that they have on TV and AM-FM radio today. Its really all about the dollar, XM gives the information to the people for a yearly fee without commercials. TV and AM-FM radio have commercials that I flat dont like, like I could care less about a new car or something else that I don't need or can't afford. Thankyou
RFD
